Please reject the NAB's petition 04-160 and support XM Radio's ability to provide local programming - including Instant Traffic & Weather. In different parts of the country, the terrain limits the ability to receive local signals - especially AM Radio, where this type of information is generally broadcasted.

If local stations want more listeners, improve quality of material and broadcast equipment. Do not limit others due to one's inability or unwillingness to compete. This country was not founded this way - it should not be run this way.
